Intern Report Subtitle

Your Name

N⟨Your UID⟩

Degree Program (MSCS or MSIS)

Internship Semester and Year

Employer and Employer Location

Supervisor Name and E-mail

Disclaimer: This report is submitted to NYU's Computer Science Department for the sole purpose of assigning an internship grade. The information remains confidential and proprietary to the company.

Abstract

An abstract is not an introduction, it is a brief (50-70 words) summary of your report.

Introduction

Explain which company you interned with, where the facility was located, what the business of the company is, the area you worked in and the main emphasis of your internship.

Project Discussion

Discuss in detail the areas of responsibility you had to deal with during your internship. Although this is an overview of your internship experience, include technical details about the projects you worked on. How many lines of code? What technologies, languages, tools, systems were used? Discuss the significance of your efforts relative to the company's operations.

Summary and Conclusion

Summarize your work and learning experience. Explain how the internship either reinforced or changed your career goals. Discuss any new perspectives you obtained because of this experience. Elaborate on the benefits you realized from the internship. Did you face any challenges or difficulties in your assignments? How did you solve these issues? In what ways did you apply what you have learned in your graduate courses to the internship? What NYU courses have been helpful? What useful skills could NYU have provided for you? What curriculum additions or changes would you suggest as a result of your experiences?
